KHAN SAAD ALIKHAN

Mumbai, Maharashtra | +91 9370030485 | Email | Linkedin | Github

Professional Summary

Computer Engineering undergraduate (2026) with experience building full-stack applications, backend systems, and AI-powered software using Python, Java, React, FastAPI, and PostgreSQL. Strong foundation in data structures, algorithms, object-oriented programming, and software engineering principles. Published researcher (IJCST 2026) and Smart India Hackathon award recipient. Passionate about solving complex engineering problems and building scalable, maintainable software.

Technical Skills

Languages:	Java, Python, C, JavaScript (ES6+), SQL
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend:	FastAPI, Node.js, Express.js, REST APIs, Microservices
Databases:	PostgreSQL, MySQL, MongoDB
AI / ML:	Google Gemini API, LLM APIs, Scikit-learn, NumPy, Pandas
Developer Tools:	Git, GitHub, Docker, Postman, Linux, Firebase, Vercel
Concepts:	OOP, DSA, DBMS, OS, Software Architecture, Agile, CI/CD, RESTful Services

Experience

Python Developer Intern **Dec 2023 – Jan 2024**
CodSoft *Remote*

- Developed Python applications using object-oriented programming principles and modular code architecture.
- Identified and resolved software defects through systematic debugging and testing, improving application reliability.
- Collaborated with developers using Git version control and participated in code reviews during Agile development.

Projects

CourseCraft – AI-Powered E-Learning Platform *Python • FastAPI • React.js • Next.js • PostgreSQL • Firebase • Google Gemini API*

- Engineered full-stack AI-powered learning platform integrating React frontend, FastAPI backend, and PostgreSQL database.
- Developed REST APIs for user authentication, course generation, and AI-powered chatbot functionality.
- Integrated Google Gemini API to dynamically generate personalized learning content based on user prompts.

EVUA – Enhanced Version Upgrade Assistant *Python • Java • FastAPI • LLM APIs*

- Designed an LLM-powered software migration assistant to automate legacy code modernization across multiple programming languages.
- Built backend services to analyze source code and generate migration recommendations using large language models.
- Published research in the International Journal of Computer Science and Technology (IJCST), 2026.

Raise Your Issue – Complaint Management Platform *React.js • Node.js • PostgreSQL • MySQL • JWT • REST APIs*

- Built full-stack complaint management platform enabling users to submit, track, and manage public issues.
- Developed RESTful backend APIs with JWT authentication and implemented role-based access control.
- Designed relational database schemas; participated in testing and code reviews to maintain software quality.

Education

Bachelor of Engineering – Computer Engineering | 7.77 CGPA **2022 – 2026**
Anjuman-I-Islam's Kalsekar Technical Campus (AIKTC), University of Mumbai *Panvel, India*

- Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering.
- Programmers Club – Technical Team Member (2023–2024): Organized workshops and mentored junior students.

Higher Secondary Certificate (HSC) – Science | 58.67% **2022**
Fatima Jr. College, Maharashtra State Board *Ambernath, India*

Secondary School Certificate (SSC) | 82.40% **2020**
S.I.C.E.S. High School, Maharashtra State Board *Ambernath, India*

Research

EVUA: AI-Assisted Legacy Code Migration Using Large Language Models *IJCST, 2026*

Certifications & Achievements

- **Best Presenter** – Internal Smart India Hackathon (2025) | **Participant** – Smart India Hackathon (2022, 2023)
- Build Real World AI Apps with Gemini & Imagen – Google | Prompt Design in Vertex AI – Google
- Tata Data Visualisation – Forage (2025) | AI Fundamentals – IBM | Python Programming – MKCL (2025)
